NP PROPAGANDA ROUND INSTRUCTIONS (C8.5.9)

VICTORY?

Victory Check: A human playing solitaire against three NP Factions may only win if it is the final Propaganda Round.

RESOURCES

Ignore **Earnings** steps for NP GOV, NP DR, and NP 26J.

The Skim: Resources transferred to NP Factions are still removed from SYN Resource total.

Cash Deposits:

- NP GOV uses Cash to **Place Bases** in Provinces without GOV Bases if possible, then gains a +1 modifier to the Civic Action die roll in the Support Phase for each additional Cash returned to Available.
- NP DR and NP 26J use Cash to **Place Bases** if possible, then return any additional Cash to Available with no further effect.
- NP SYN uses Cash to **Place Casinos**, then, only if final Propaganda Round, to **Open Casinos** until there are 8 Open Casinos; then to gain Resources.

SUPPORT

Civic Action: NP GOV selects spaces to shift toward Active Support using **Shift Toward Active Support**, up to a maximum number of Terror removed and shifts equal to 1d3 plus the number of Economic Centers without Sabotage.

Agitation: NP 26J selects spaces to shift toward Active Opposition using **Shift Toward Active Opposition**, up to a maximum number of Terror removed and shifts equal to 1d3 plus the number of 26J Bases on the map.

Expatriate Backing: NP DR draws a *Calixto* card for Rally instructions, but treats Active DR Guerrillas as Underground when checking for Vulnerable DR Bases.

REDEPLOY

Move cubes as outlined below and keep other cubes in their current spaces. Except as a result of Troops exiting Provinces without a GOV Base: keep GOV forces to exceed all insurgent forces. Move each cube only once within the following guidelines:

- Within each numbered instruction, move cubes using **Place Cubes** to select destination spaces.
- Move Police one at a time from spaces with the most Police.
- Move Troops from Provinces without a GOV Base first, then one at a time from spaces with the most Troops.

① Get 1 Police to each space with GOV Control.

② Move Police to exceed insurgent forces (including Closed Casinos) in all Provinces with GOV Control and no GOV Base.

③ Move Police to equal all Guerrillas in ECs, highest Econ first.

④ Move Troops in Provinces without a GOV Base and on ECs as evenly as possible to spaces with GOV Control (Cities and Provinces with a GOV Base only), using **Place Cubes** to determine priority if necessary.

RESET

Shuffle the *Calixto* deck.

NP GOLDEN RULES (C8.2.1)

- **NP Factions Follow the Rules (Almost).** NP Factions abide by all applicable *Cuba Libre* rules, with these exceptions:
 - NP Factions never remove pieces from the map to Available when lacking pieces for an Operation, Special Activity, or Event (1.4.1).
 - NP GOV, NP 26J and NP DR do not track Resources. Ignore any instructions to increase or decrease NP Resources when they are not tracked. If an Operation, Special Activity, or Event would transfer Resources between one of these NP Factions and a player Faction or NP Syndicate, the player Faction or NP Syndicate will just gain or lose the indicated number of Resources.
 - NP SYN tracks and spends Resources in the same way as a player Faction. Aid should be tracked even if GOV is an NP Faction, as it can have an effect on some Events.
 - NP Factions roll against an Activation Number to limit total spaces selected (C8.5.4).
- **Skip illegal instructions.** *Calixto* will only tell you what to do, it will not tell you how to do it or even carry out *Calixto*'s instructions as much as possible, but if *Calixto* ever gives you an instruction that cannot be carried out legally, just skip it.
- **Implement All Instructions Literally.** Do not infer more to an instruction than what the text actually specifies.
- **Placing Friendly Pieces.** When executing Operations, Special Activities, or Events that allow the acting Faction to place pieces in multiple spaces, NP Factions place pieces one at a time. In such cases, select the destination for each piece one at a time, using the NP Faction's Space Selection Priorities table. During Train and Rally Operations, NP Factions will place as many pieces as possible, following the directions on the *Calixto* card and the limits of the given Operation. If multiple types of pieces could be placed, determine the pieces to be placed using the Piece Priorities table.
- **Removing Friendly Pieces.** When given a choice, NP Factions remove pieces one at a time, from the space with the most pieces belonging to the affected NP Faction. Use the Piece Priorities table to select pieces to remove from each selected space reading from the bottom up and right to left.
- **Operation and Special Activity to the Maximum Extent.** NP Factions always execute a selected Operation or Special Activity to the maximum extent allowed, given the state of the board, available pieces, and Activation Number die rolls.
- **Using Cash.** NP GOV, NP 26J, and NP DR will always use held Cash markers for a free limited Operation at the first opportunity, i.e., when they next perform an Operation Only or Limited Operation. Draw an additional *Calixto* card to execute this free Limited Operation. NP SYN will never do so.
- **Removing Cash.** When forced to remove Cash, NP Factions will pass it to another of their pieces in the same space if possible, then to another NP Faction in the same space, in the order NP GOV, NP DR, NP 26J, NP SYN. If no other NP Faction can receive the Cash then they will remove it to Available.
- **When in Doubt, Randomize.** Whenever NP Factions need to select from among several options and supplied instructions have been exhausted, select one option at random.
